Welcome to Embrapa Pantanal

Embrapa

The Brazilian Agricultural Research Corporation's mission is to provide feasible solutions for the sustainable development of Brazilian agribusiness through knowledge and technology generation and transfer.

From the very beginning, on April 26, 1973, Embrapa has generated and recommended more than nine thousand technologies for Brazilian agriculture, reduced production costs and helped Brazil to increase the offer of food while, at the same time, conserving natural resources and the environment and diminishing external dependence on technologies, basic products and genetic materials.

Embrapa develops special programs and projects concerning areas such as food safety, family agriculture, natural resources, advanced technology and agribusiness, and acts as a partner in several others.

Embrapa is not only the largest Agricultural Research Institution in Brazil, but extends its actions to North America and Europe as well, where it maintains two laboratories of technological prospecting and institutional exchange in the United States and France.

Embrapa maintains projects in International Cooperation in order to perfect knowledge of technical and scientific activities or to share knowledge and technology with other countries.

Embrapa Pantanal

Located at Corumbá (MS), Embrapa Pantanal has the mission to provide technological solutions for the sustainable development of the agribusiness of the Pantanal, offering, adapting and transferring knowledge

and technologies, in benefit of the society. Our main fields of research are Animal Wildlife, Flora, Fishing Resources, Beef Cattle, Environment Impacts and Familiar Agriculture.

Embrapa Pantanal has the mission to make possible technological solutions for the sustainable development of the agribusiness of the Pantanal, by means of the generation, adaptation and transference of knowledge and technologies, in benefit of the society.

The Brazilian Pantanal is the biggest subject to flooding continental area of the planet and encloses the states of Mato Grosso do Sul and Mato Grosso. By its importance and abundance of wild life was declared by UNESCO, as World Wide Reserve of the Biosfera.
